## 🗨 LANGUAGES

English, Portuguese, Spanish

## 🎓 EDUCATION

### Full-Stack Web Development

**Ironhack Lisbon** 📄

Jan 2022 – Mar 2022 | Lisbon, Portugal

Award winning final project:

- "Most original project"

### Bachelor's degree of Arts (Hons) in Business

**CCT College Dublin** 📄

Feb 2019 – Dec 2021 | Dublin, Ireland

Award Level -NFQ Level 8 Major Award

## 📁 PROFESSIONAL EXPERIENCE

### Full Stack Developer

@AgroBI

Jul 2024 | Lisboa, Portugal

**Developed and maintained a project cost management software** for one of Brazil's most respected hospitals. Leveraged **AngularJS** and **.NET C#** for application development and implemented **PostgreSQL** for robust data handling. The solution optimized cost tracking and resource allocation processes, directly supporting the hospital's financial operations and improving overall efficiency. Played a key role in designing, coding, and testing the application, ensuring scalability and reliability for high-volume data transactions.

### Frontend Developer

@Teapayment

Jun 2022 – Jun 2024 | Lisbon, Portugal

I spearheaded the development of an innovative investment simulator. **smartinvestmentsimulator.com** 📄 This tool empowers clients to simulate diverse investment products within a single interface. I initiated the project by formulating an Agile spike story, subsequently presenting potential strategies and alternatives to core team leaders.

Developed an investment platform, **ibanwallet.com** 📄, utilizing ReactJS and TypeScript. My role in this high-traffic platform included adding new features like investment flows and user authentication.

Participated in the development of **mysundaymarketplace.com** 📄 from scratch by creating its pages, components and tests. Added new features such as cookie consent banner, navigation bar, footer, language dropdown menu allowing the website to be displayed in different languages.

Rewrote legacy code and added new features to **neowintech.com** 📄

Developed and deployed multiple web pages for the company, including **safebrok.com** 📄 and **safebrokeurope.com** 📄, focusing on creating maintainable, well-tested components and responsive designs for both web and mobile platforms. Implemented internationalization to support multiple languages using Lokalise, enhancing the accessibility and global reach of the websites. Designed and built a dynamic careers section, enabling seamless management of job postings by integrating with the Google Sheets API for adding new roles and removing outdated ones.
