## 💼 PROFESSIONAL EXPERIENCE

**Frontend Developer**
**@Teapayment**

Jun 2022 – Jan 2024 | Lisbon, Portugal

Contributed to the development of an investment platform, **ibanwallet.com** ↗ , utilizing ReactJS and TypeScript. My role in this high-traffic platform included adding new features like investment flows and user authentication.

Supported the development of a back office portal to manage users that was heavily integrated with the database developed by our backend team. Throughout my work on both projects, I gained experience consuming APIs to display and edit data.

Participated in the development of **mysundaymarketplace.com** ↗ from scratch by creating its pages, components and tests. Added features such as cookie consent banner, navigation bar, footer, language dropdown menu allowing the website to be displayed in different languages.

Rewrote legacy code and added new features such as cookie consent banner to **neowintech.com** ↗

Created and delivered various pages for the company including **safebrok.com** ↗ and **safebrokeurope.com** ↗ . This involved creating maintainable and well tested new components and styling for web and mobile, internationalization of websites by displaying various languages with lokalise. Built a careers section allowing new roles to be added and old roles to be deleted though a google sheets API.

On my newest project **smartinvestmentsimulator.com** ↗ I spearheaded the development of an innovative investment simulator. This tool empowers users to simulate diverse investment products within a single interface. I initiated the project by formulating an agile spike story, subsequently presenting potential strategies and alternatives to core team leaders.

**Operational Manager**
**GroundUp Coffee** ↗

Mar 2021 – Dec 2021 | Dublin, Ireland

Oversaw daily operations of the coffee shop, including managing employees and maintaining inventory levels.
Hired, trained, and scheduled staff members, ensuring they were properly trained on all aspects of coffee preparation, customer service, and safety protocols.
Created and maintained a positive and productive work environment, fostering a culture of teamwork.
